Symposium: update on the surgical treatment of postprostatectomy incontinence

3 October 2014

Directors:

Dr. Humberto Villavicencio (Director of the Urology Department)

Dr. Pere Arañó (Head of the Functional and Female Urology Unit and Urodynamics Laboratory)

Venue: Fundació Puigvert's conference hall (Cartagena, 340 08025 Barcelona)

Introduction:

Among the increasingly diverse pathologies managed at our Functional and Female Urology Unit, post-prostate surgery male urinary incontinence is among the most common. The reasons for this are the very high number of prostate cancer interventions due to the increasing frequency of the diagnosis and the variety of therapeutic options now available, particularly male slings.

Information and registration:

Fundació Puigvert

Servicio de Secretaría General y Docente

Faculty:

Arañó, P.

Head of the Functional and Female Urology Unit and Urodynamics Laboratory, Urology Department, Fundació Puigvert

Errando, C.

Consultant at the Functional and Female Urology Unit and Urodynamics Laboratory, Urology Department, Fundació Puigvert

Gutiérrez, C.

Consultant at the Functional and Female Urology Unit and Urodynamics Laboratory, Urology Department, Fundació Puigvert

Rehder, P.

Innsbruck Medical University, Innsbruck, Austria

Activity development:

The aim of this meeting of urologists particularly interested in this pathology is to enable participants to witness real-time surgical procedures, followed by discussions and contributions on the subject with reference to clinical cases.

Objectives:

To examine clearly, systematically, and in depth the existing options, with particular emphasis on the contributions from experts attending the meeting.

To achieve a natural and free-flowing dialogue among participants, paying specific attention to their experience.

To present Fundacio Puigvert's diagnostic and therapeutic protocols on this pathology.

Target audience:

Urologists specifically interested in urinary incontinence and disorders of vesico-urethral function.

Methodology:

Live surgeries in the morning, including intra-operative comments and practical contributions from the surgeon immediately after the procedure.

Exposition of the topics and of practical clinical cases that provide an idea of our daily medical experience.
